Hi Dave – DEP also got a call on this Pilgrim issue from Chris Legere at the Cape Cod Times. So, we were planning on providing the following statement and really asking her to contact EPA for a further update... Here is the statement below.

Thanks, Ed

“Massachusetts is not a delegated state, so EPA Region 1 is the lead on issuing NPDES permits, including the permit for Pilgrim Nuclear. For the last few years, MassDEP has been working with EPA Region 1 to draft a new discharge permit for Pilgrim. A major part of that work is a cooling water intake analysis that is currently being completed by the EPA. Once that analysis is finished, the draft permit will be made available for public comment by EPA. In the meantime, the current discharge permit remains in force.”

Hi Ed, attached is some background language from my team. Hope this helps – we've still not been contacted by BUR so not planning anything proactive on this..

Dave
